Prior Art Citation

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Minamino et al. (2003/0043718) and Ueki et al. (2002/0048239), both disclose an optical disk apparatus having the ability of decoding the wobble information on the optical disk in order to generate clock information using a PLL circuit.

Reasons For Allowance

2. The following is an Examiner's Statement of Reasons for Allowance:

Re claims 1-5

The prior art of record alone or in combination does not teach or suggest the method of decoding address data of an optical disc drive for decoding an input wobble signal into an address data unit signal having the combination of elements of the optical disc drive and the combination of step with their recited process, and taken the claims as a whole along with:

multiplying the wobble frequency signal, output by the cosine signal generator, with the input wobble signal to obtain a product signal using the multiplier;

Art Unit: 2627

accumulating the product signals at each clock to obtain a quotient summation signal using the accumulator',

determining phase changes of the input wobble signal according to whether the quotient summation signal is positive or negative to obtain a phase change signal using the phase data processor', and

comparing the of address data phase change signal with the plurality patterns using the address data unit detector, and determining an address data unit signal according to the address data pattern closest to the phase change signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
